

# Mauro Sebastian Bringas

## Front End Developer

Creative and results-driven Front-End Developer with a strong foundation in **React** and **React Native**, passionate about building functional, user-friendly applications. Graduated as a **Technician in Software Development and Quality** in just 2.5 years while collaborating with Globant and Sovos managers on software projects.

Skilled in customizing, testing, and implementing usability designs to elevate user experiences and optimize team productivity. A confident, determined, responsible and proactive collaborator.

## Experience

### PETSION ([petsion.com.ar](https://petsion.com.ar)) - React Front End Developer

March 2024 – August 2024 (6 months)

- Using React with a REST API and a three layer architecture developed geolocalization features to connect 20 million potential pet owners in Argentina with pet sitters.
- Making use of the agile framework SCRUM with Kanban board.
- Kept the project on schedule through regular check-ups, ensuring that all collaborators were staying on task resulting in a 4 weeks time saved on finishing the project.

Tech Stack: React 18.2, Axios 1.6.8, React Bootstrap 2.10, Leaflet 1.9.4, Figma.

## Projects

### Outfy App

October 2024 - December 2024

Designed and developed a social media app from scratch with **React Native**, aimed at connecting nearly 3 million fashion enthusiasts by allowing users to post and share outfit details, including clothing brands and names.

- Implemented a **modular architecture** with **Redux** and **Context API**, ensuring seamless state management and scalability for future features.
- Focused on user-centric design and performance optimization by leveraging **React Native Paper** for a polished UI and **React Navigation** for intuitive navigation.
- Developed a robust backend with **Express**, laying the groundwork for secure user authentication, data storage, and API integrations for future growth.

Tech Stack: Frontend: React Native 0.74.5, React 18.2, Expo 51.0, React Native Paper 5.12.5, React Navigation 6.1.18. State Management: Redux 9.1.2. Backend: Express 4.17.

## Education

- Technician in Software Development and Quality at UNSTA University 2022-2024
- [Full Stack Web Developer on Rolling Code](#)
- [React Native Course on Udemy](#)

## Languages

English B2 - Professional.

Spanish - Native.
